ChatGPT Prompt for Course Compilation

(EDITING USING OpenAI's GPT4 CODE INTERPRETER)

COPY AND PASTE THE FOLLOWING PROMPT INTO (CODE INTERPRETER GPT4):

PROMPT FOR CODE INTERPRETER GPT 4 ONLY:

I have a new course that I would like to consolidate into a single, comprehensive PDF document. The course will be presented by the Connecticut Cannabis Small Business Alliance (CCSBA). Please make sure that all text is correctly formatted and that there are no duplicate lessons or content, while preserving all information from the lessons.

Attached is the ZIP file containing all the course materials.

Once the compilation is complete, please provide me with a downloadable link to the PDF, which will be titled [insert course title]. The document should be thorough and written at a college-level standard. Initially, simply copy and paste all the content from the course into one master PDF. This PDF should cover the entire course in detail, without omitting any information.

After this initial step, we will perform a deep analysis of the document to ensure that there are no repetitive lessons or content. All lessons should contain original material and not reiterate topics using the same wording as in previous lessons.

As mentioned earlier, the course will be presented by the CCSBA, and all content should reflect this. Please ensure that the final PDF is flawless before presenting it to me. Note that any editing and refinements will take place after we have successfully compiled the initial document.

For your reference, the attached course material should be used to complete this task in its entirety: [attach the course data here].

---

(BEFORE HITTING ENTER HIT + and upload the course to be compiled.) To do this

HIT+ button and [Upload 1 Course ZIP file with course materials containing all modules]

STEP 2:  OPEN NEW CODE INTERPRETER FRESH UNUSED WINDOW:

PROMPT2 :

Hi, I have a comprehensive PDF of my "Cannabis Finance" course that I'd like you to review. Your task is to edit the document, identifying areas that require more detailed explanations. Please share your findings with me. The document spans over 200 pages and is in PDF format. In the course material, I need you to correct any repetition errors, formatting issues, and instances where certain subjects are discussed redundantly. Additionally, please address any concerns about the placement of chapters, such as Chapter 1 and Chapter 2 appearing out of order. I believe they might be misplaced. I'm sharing the course data document with you for the editing process. The goal is to create a final PDF version that I can use for my online course.we are not looking for repeating words we are looking for repeated teachings and or lessons. Addfitionally this should have a glossary and a complete Table of Contents of chapters and sections at the beginning of the document organizing the class structure to be easily

readable and more understandable. Be Sure it matches the entire course content and is complete.  Thank you!

ATTACH FULLY COMPILED PDF NON-EDITED VERSION

STEP 3: OPEN NEW CODE INTERPRETER WINDOW BE SURE IT IS NEW AND UNUSED

PROMPT 3: Using the attached course please reformulate the structure of it to make the chapter numbers and sections line up and be presented in the correct order so the course is organized and perfectly presented please make this in a final pdf document once we make the changes needed as you can see everything is randomly labeled and i want you to read the entire document and reorganize it to its best ability be sure not to delete any data or lesson but it needs to be organized and presented with a clear table of contents directory that matches with the entire form of the document: here it is see the attachment

[attach the newly formed docoment and have its glossary arrangement and organized]
